## SUMMARY

4 years of .NET full-stack engineering (C#/.NET Core with React and Angular), promoted twice in that time, from full-stack developer on a WHO project across 5 countries to architect of a company-wide CQRS platform (350+ employees) and mentor to 6 junior developers.

## SKILLS

**.NET & Backend:** C#, .NET Core, ASP.NET Core, Entity Framework Core, LINQ, SQL, REST API Design, SignalR, gRPC/Protocol Buffers, Hangfire  
**Frontend:** React 18, Angular, TypeScript, JavaScript, Redux Toolkit, HTML/CSS  
**Architecture:** System Design, CQRS, MediatR, SOLID Principles, Design Patterns, Distributed Systems  
**Testing, CI/CD & Observability:** Unit Testing (xUnit), Code Review, Jenkins, CI/CD Pipelines, Root-Cause Debugging, OpenTelemetry, Serilog, Agile/Scrum  
**Security:** OWASP Top 10, Authorization Design (IDOR prevention), OTP/Hash-Based Access Control, Secure Code Review  
**Cloud, Scripting & AI:** Azure (App Services, Functions, CI/CD), Docker, Linux, Git, Python, Bash, PowerShell; AI-Assisted Development (Claude Code, Gemini CLI); LLM/RAG Integration (OpenAI, Gemini, Ollama)

## EXPERIENCE

**Argusoft Ind Ltd.**, Gandhinagar, Gujarat May 2022 – Present  
*Lead Solution Analyst (SDE II & Full Stack Platform Engineering)* Aug 2026 – Present  
*Solution Analyst* Aug 2024 – Aug 2026

- Architected Pramaan, a full-stack compliance and device-management platform (CQRS/MediatR .NET Core, React 18/TypeScript) adopted across the organization to manage 320 machines, with live status streamed over SignalR.
- Cut per-framework remediation effort from roughly 2 weeks to ~1 week (estimated; varies by framework) by replacing hand-written scripts with organization-specific YAML policy that hardens every new employee machine.
- Shipped a Package/Application Inventory module (schema, API, React UI), now used organization-wide, with OS-aware visibility across 6+ platform variants.
- Secured sensitive actions with a time-boxed, SHA256-hashed OTP system and delivered a software allow-listing system, both spanning schema, CQRS API, and React UI.
- Diagnosed an EF Core LINQ-to-SQL bug (an in-memory predicate that could not translate to SQL) and fixed it by materializing the query first, eliminating the runtime crash at two call sites.
- Traced silent failures to a frontend HTTP middleware that swallowed error codes; failed imports no longer report success.
- Improved resiliency with Hangfire-backed recurring runs and an offline-agent path so disconnected endpoints fail visibly.
- Led CI/CD and integration work (Jenkins, plugin manifests) with several teammates on the agent self-update pipeline.
- Mentored 6 junior .NET developers on CQRS and clean architecture; one now ships production code.

*Programmer Analyst (Full Stack, WHO Project)* May 2022 – Aug 2024

- Grew into primary maintainer over 2.5 years: reviewed 400+ pull requests and stood up multi-environment CI/CD pipelines.
- Partnered with cross-functional teams and WHO stakeholders to resolve 95% of inquiries within 24 hours.
- Developed a new Angular UI module and the External Expert module's full lifecycle (reviewer workflows, scheduled sync service) from scratch for a project serving ~150 users across 5 countries.
- Closed IDOR exposure on 16 of 18 controllers (~167 endpoints) with a centralized authorization framework.
- Migrated the backend from .NET 5 to .NET 8 (completed Jul 2024), fixing breaking changes.
- Surfaced 5+ undetected critical error sources through centralized exception logging across 5 Azure Functions jobs, cutting monitoring effort 25%.

## PROJECTS

**RAG Document Q&A** | ASP.NET Core, .NET 8, OpenAI SDK, EF Core/SQLite Aug 2026

- Engineered a provider-agnostic RAG pipeline verified on OpenAI, Gemini, and local Ollama, with hallucination guardrails (similarity threshold, context token budget, no-context fallback) and source-attributed answers.

## EDUCATION & CERTIFICATIONS

**Government Engineering College**, Gandhinagar Jun 2018 – May 2022  
Bachelor of Engineering in Computer Engineering, CGPA 8.61/10  
CERT-IN VA/PT Round 3 qualified (Apr 2025) | ISC2-CC (Certified in Cybersecurity)
